# ABSORPTION THAT ADAPTS + SORBACT® TECHNOLOGY

Cutimed® Siltec® Sorbact® is an innovative combination of reliable absorption and Sorbact® Technology. The super-absorbent particles within the foam layer effectively adjust to absorb moderate to high, viscous exudate and retain it even under compression.

## TOTAL FLUID HANDLING CAPABILITY

- Super-absorbent hot-melt stripes ensure vertical absorption of exudate reducing the risk of maceration.
- Dynamic MVTR allows fluid to transpire while also maintaining a moisture balance.
- Good flexibility and conformability with new unique sizes. Easy application and reliable adhesion on contoured body parts and joints.
- Silicone layer minimizes pain with atraumatic dressing changes, and wound bed remains undisturbed. This increases patient comfort and compliance.

## RELIABLE ABSORPTION – EVEN UNDER PRESSURE

Lab test: Cutimed® Siltec Sorbact® has the highest retention under compression of all tested products (2011, in-vitro, data on file)

\*\*This document includes codes that might be used to bill for BSN medical products and related services. Each provider will have to verify the appropriate codes for each patient. It is the provider's sole responsibility to determine and submit appropriate codes, charges and modifiers for services rendered. Providers should contact insurers to verify correct coding procedures prior to submitting claims related to any product or service. BSN medical Inc. cannot guarantee coverage or reimbursement with the codes listed in this billing guide. In all cases, providers will need to follow local payer policies for billing and reimbursement.

## Indications

**Cutimed® Siltec® Sorbact®** is indicated for use in the prevention of infection and management of clean, colonized, contaminated or infected, shallow wounds with Moderate to High exudate levels such as venous leg ulcers, pressure ulcers, diabetic foot ulcers, post-operative and trauma wounds. It can also be used as an absorbent secondary dressing on deeper wounds.
